1991-2008: Early Years of Blockchain Technology

Stuart Haber and W. Scott Stornetta envisioned what many people have come to know as blockchain, in 1991. Their first work involved working on a cryptographically secured chain of blocks whereby no one could tamper with timestamps of documents. However, it is in 2008 that Blockchain History starts to gain relevance, thanks to the work one person or group by the name Satoshi Nakamoto.

Satoshi Nakamoto is accredited as the brains behind blockchain technology. Very little is known about Nakamoto as people believe he could be a person or a group of people that worked on Bitcoin, the first application of the digital ledger technology.

Nakamoto conceptualized the first blockchain in 2008 from where the technology has evolved and found its way into many applications beyond cryptocurrencies. Satoshi Nakamoto released the first whitepaper about the technology in 2009. In the whitepaper, he provided details of how the technology was well equipped to enhance digital trust given the decentralization aspect that meant nobody would ever be in control of anything.

Welcome to Golden Pro

Golden Pro Trade is unique Concept and best business opportunity with trading platform. The market strategy with best enhance technology and great leadership team

Our vision is to achieve the goal of our mission and give better opportunity to everyone. Golden Pro Business Opportunity One can achieve success in his life by sharing the unique concept to near and dears by reffer them and share the benefits of its Marketing Plan.

Golden Pro Trade is best business opportunity with trading platform. We provide the best quality material in every range. Quality of the material is our first agenda.

Start Trading with us today, and with our Trade concept.

We Provide best business Growth with the help of great leadership qualities team.

Evolution of Blockchain:

Phase I: The Transactions

2008-2013: Blockchain 1.0: Bitcoin Emergence

Bitcoin came into being in 2008 as the first application of Blockchain technology. Satoshi Nakamoto in his whitepaper detailed it as an electronic peer-to-peer system. Nakamoto formed the genesis block, from which other blocks were mined, interconnected resulting in one of the largest chains of blocks carrying different pieces of information and transactions.

Ever since Bitcoin, an application of blockchain, hit the airwaves, several applications have cropped all of which seek to leverage the principles and capabilities of the digital ledger technology. Consequently, blockchain history contains a long list of applications that have come into being with the evolution of the technology.

Evolution of Blockchain:

Phase 2: The Contracts

2013-2015: Blockchain 2.0: Ethereum Development

Officially launched in 2015, Ethereum blockchain has evolved to become one of the biggest applications of blockchain technology given its ability to support smart contracts used to perform various functions. Ethereum blockchain platform has also succeeded in gathering an active developer community that has seen it establish a true ecosystem.

Ethereum made it possible for the 3rd party developers deploy their own Dapps and smart contracts as per their own process automation requirements. For which they need not to develop their own blockchain instead require them to create their own token standards for internal transactions which directly are linked to Ethereum native coin - ether. This opened the doors to create a massive ecosystem of developers, enterprises & users.

This opened the doors to create a massive ecosystem of developers, enterprises & users.

The Current Scenario & the Future

2023 - 2035 : Enterprise Adoption Phase

The future of Blockchain technology looks bright, in part, because of the way governments and enterprises are investing big as they seek to spur innovations and applications. It is becoming increasingly clear that one day there will be a public blockchain that anyone can use.

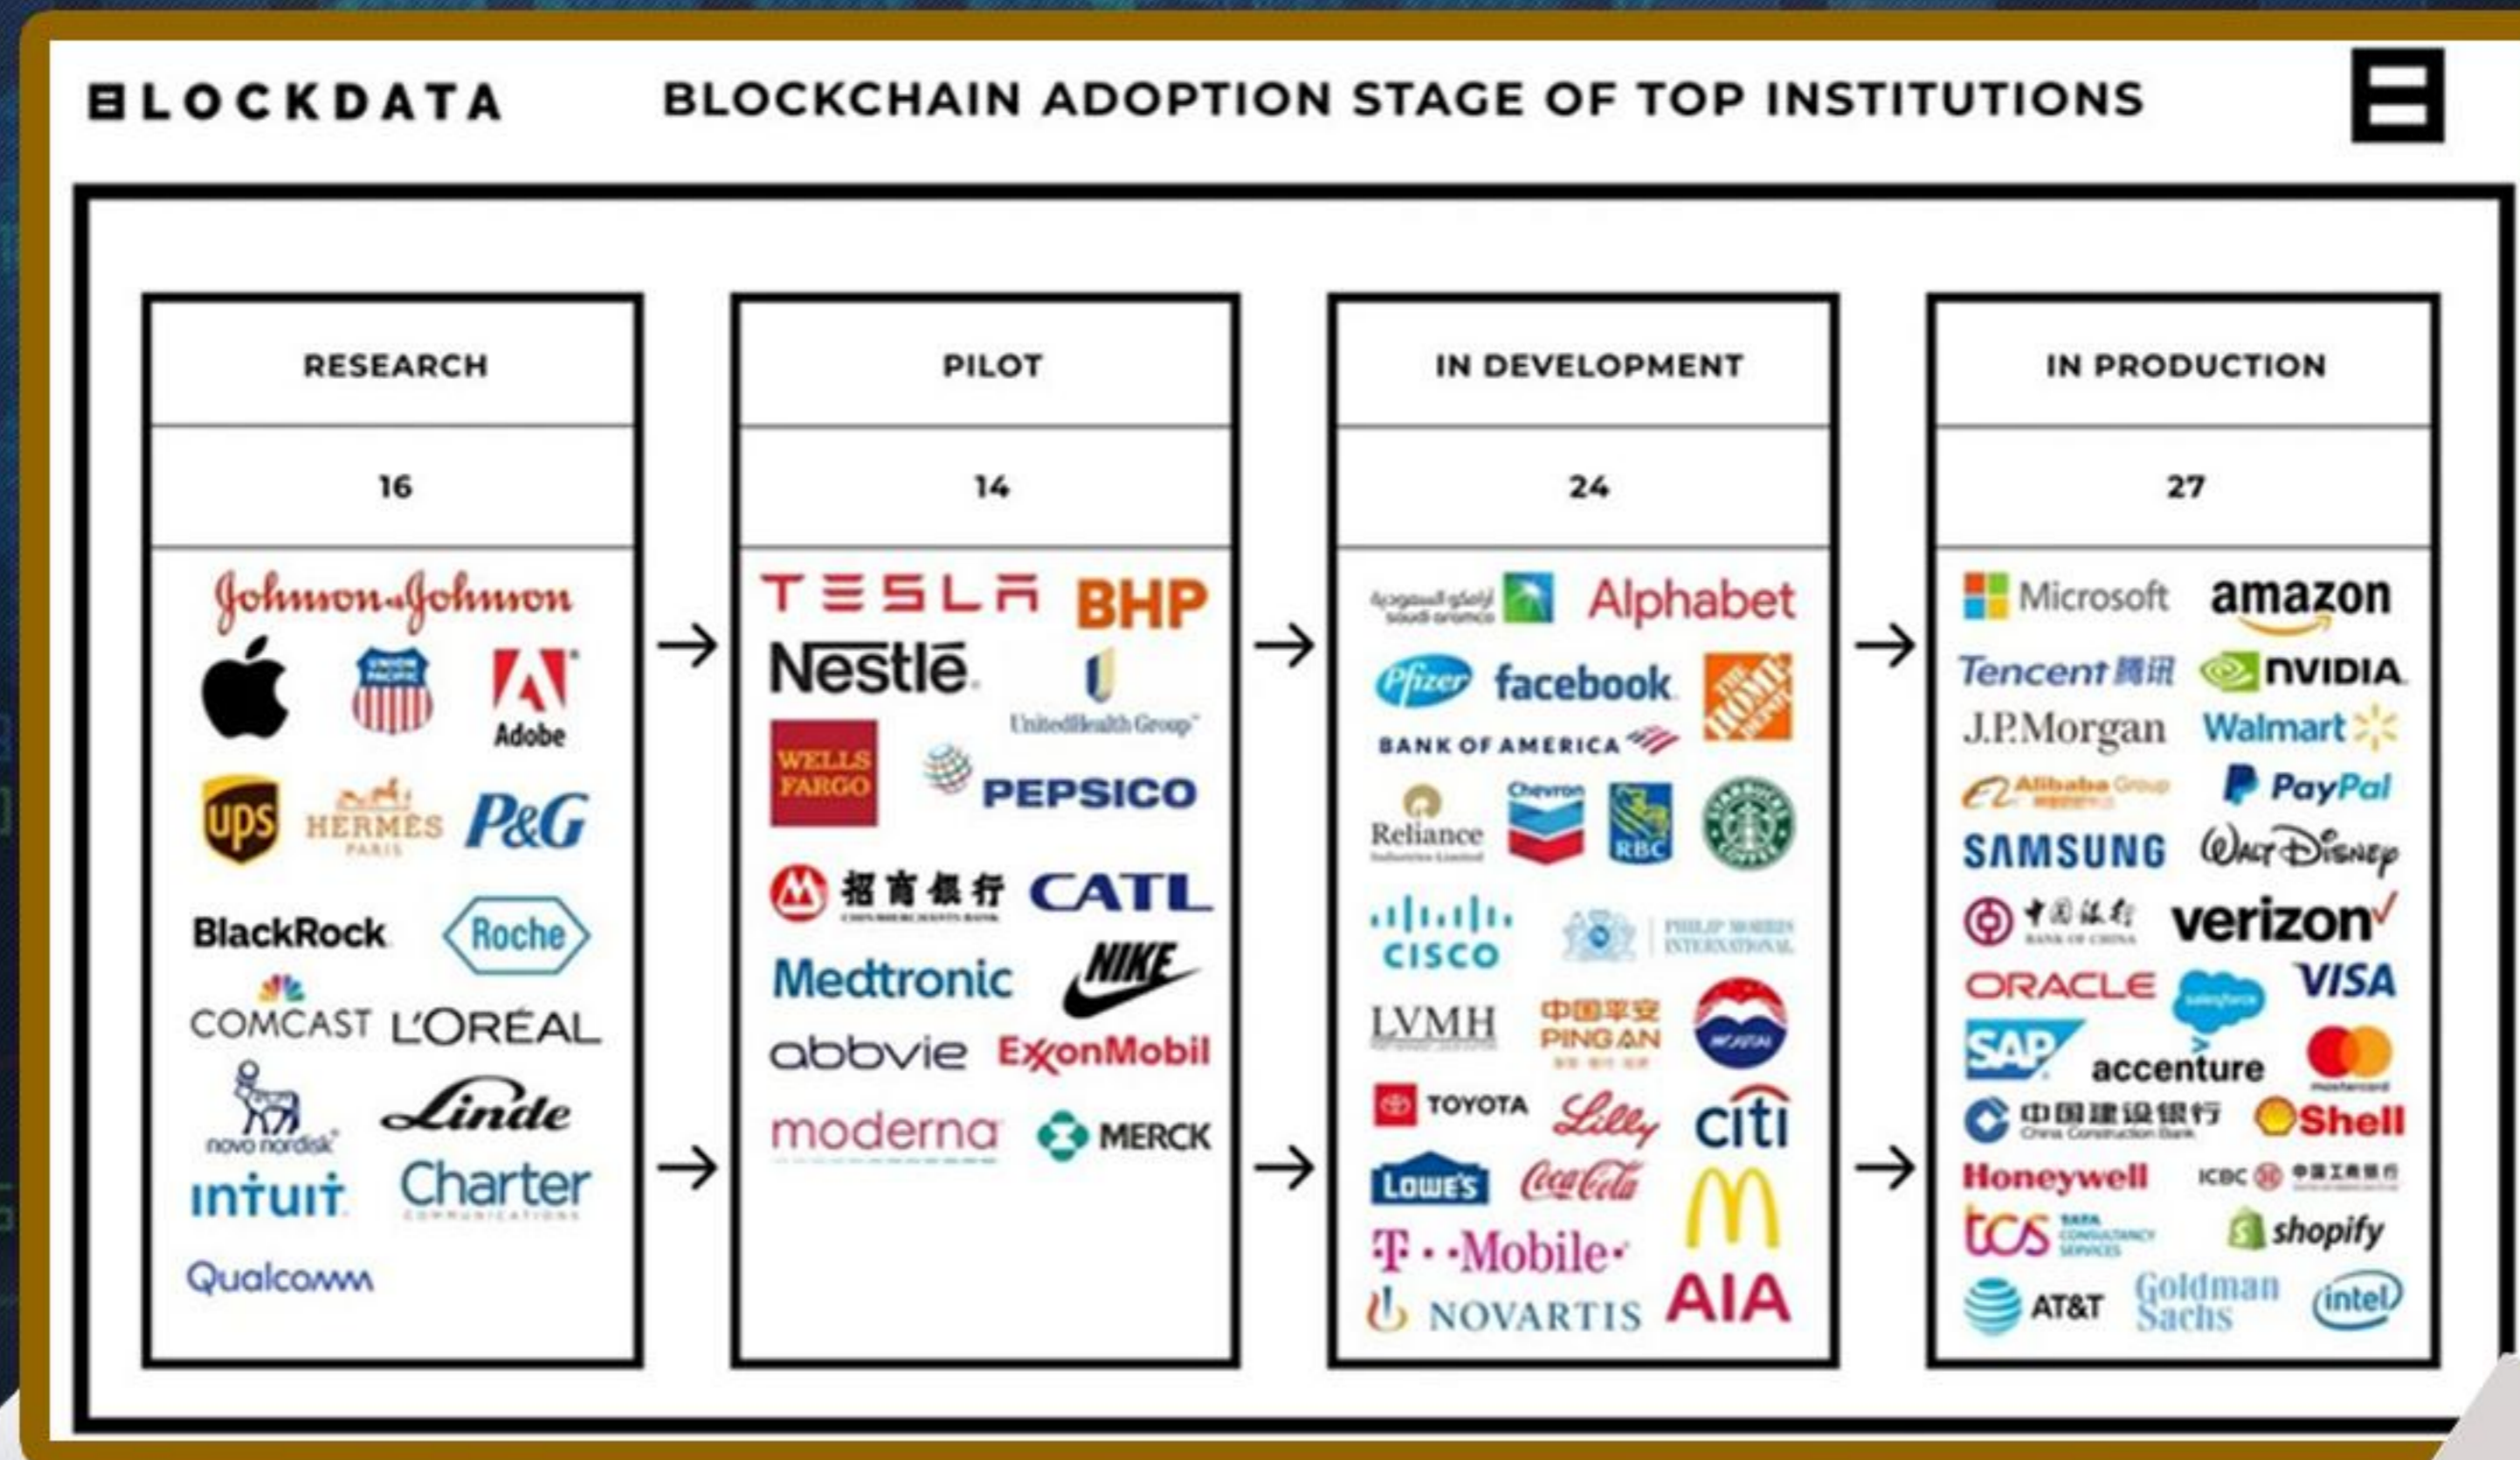

As the technology evolves, Gartner Trend Insights expects at least one business built on blockchain to come into being valued at more than \$10 billion by 2022. Due to the Blockchain Digital Transformation, the research firm expects the business value to grow to over \$176 billion by 2025 and exceed the \$3.1 trillion by 2030.

FUTURE

Institutional Adoption Of Blockchain Is Unprecedented

Blockchain technology is set to rule the future. Blockchain technology will shape the future industries. Industry 3.0 is born now. Blockchain technology has started making its way through IoT to uplift the global business & industry arena.

Over 60% Crypto Adopters Entered After Year 2020

Vietnam leads in adoption rate among counties, whereas Asia is leader continent followed by Europe & America.

The Number of Blockchain Wallet Users Jumped by 13 Million YTD

Published on September 13, 2021

As the global crypto market continues its explosive growth, with some digital coins reaching record valuation, more and more investors are entering the crypto community.

According to data presented by StockApps.com, the number of Blockchain wallet users jumped by 13 million year-to-date, reaching a total of 76.4 million last week.

User Growth Surged by 47%YTD

Over 60% Crypto Adopters Entered After Year 2020

P2P Transaction Dominates all sorts of crypto platforms with over 65% of total transfer share.

This Indicates a wave of 1st mass adoption in crypto space

The CURRENT Hot Spot

NFT (Non-Fungible TOKENS)

Blockchain technology has now entered the industry adoption phase now. NFT Projects are being introduced at unprecedented rate and so are the metaverse activities.

Thailand Has highest adoption rate among all countries

Some FCATS-n-FIGURES IN NFT SPACE

The first NFT emerged in 2014.

- › The first NFT emerged in 2014.
- › Nearly \$41 billion worth of crypto was spent on the NFT marketplaces in 2021.
- › The most valuable NFT is worth more than \$91.8 million.
- › NFT trading volume rose by 704% between Q2 2021 and Q3 2021.
- › Cryptopunks account for five of the 20 biggest NFT sales.
- › Over 50% of all NFT sales are below \$200.
- › An estimated 250,000 people trade NFTs each month on OpenSea.
- › 23% of millennials in the US collect NFTs.
- › Men are three times more likely than women to be collectors of NFTs.
- › The top five countries with the biggest NFT adoption are in Asia.
- › Nigeria is expected to have the biggest growth (21.7%) in NFT adoption.
- › People who earn less than \$25,000 per year invest in NFTs at a similar rate as those earning over \$150,000.
- › In Thailand, more women than men own NFTs.
- › More than 70% of Americans still don't know what an NFT is.

Popular Stories In NFT

The first NFT emerged in 2014.

- A LeBron James NFT sold for more than \$21.6 million.
- Twitter founder, Jack Dorsey, sold his first tweet in NFT format for \$2.9 million.
- Eminem sold his first NFT collection for \$1.78 million.
- Elon Musk's ex-girlfriend, Grimes, sold thousands of NFTs, netting more than \$7 million.
- Human One, a piece of NFT artwork, fetched \$28.9 million at auction.
- The number of NFT art sales surpassed 1.5 million in a single month in 2021.
- The world's most expensive NFT meme sold for more than \$4 million.

Most expensive NFTs artworks

- The Merge: USD 91.8 million
- Everyday - The First 5000 Days: USD 69.3 million
- Human One: USD 28.9 million
- CryptoPunk #5822: USD 23.7 million
- CryptoPunk #7523: USD 11.75 million

The Hot Spot

Metaverse

The Metaverse is a \$1 Trillion Opportunity After Users Increase 10X

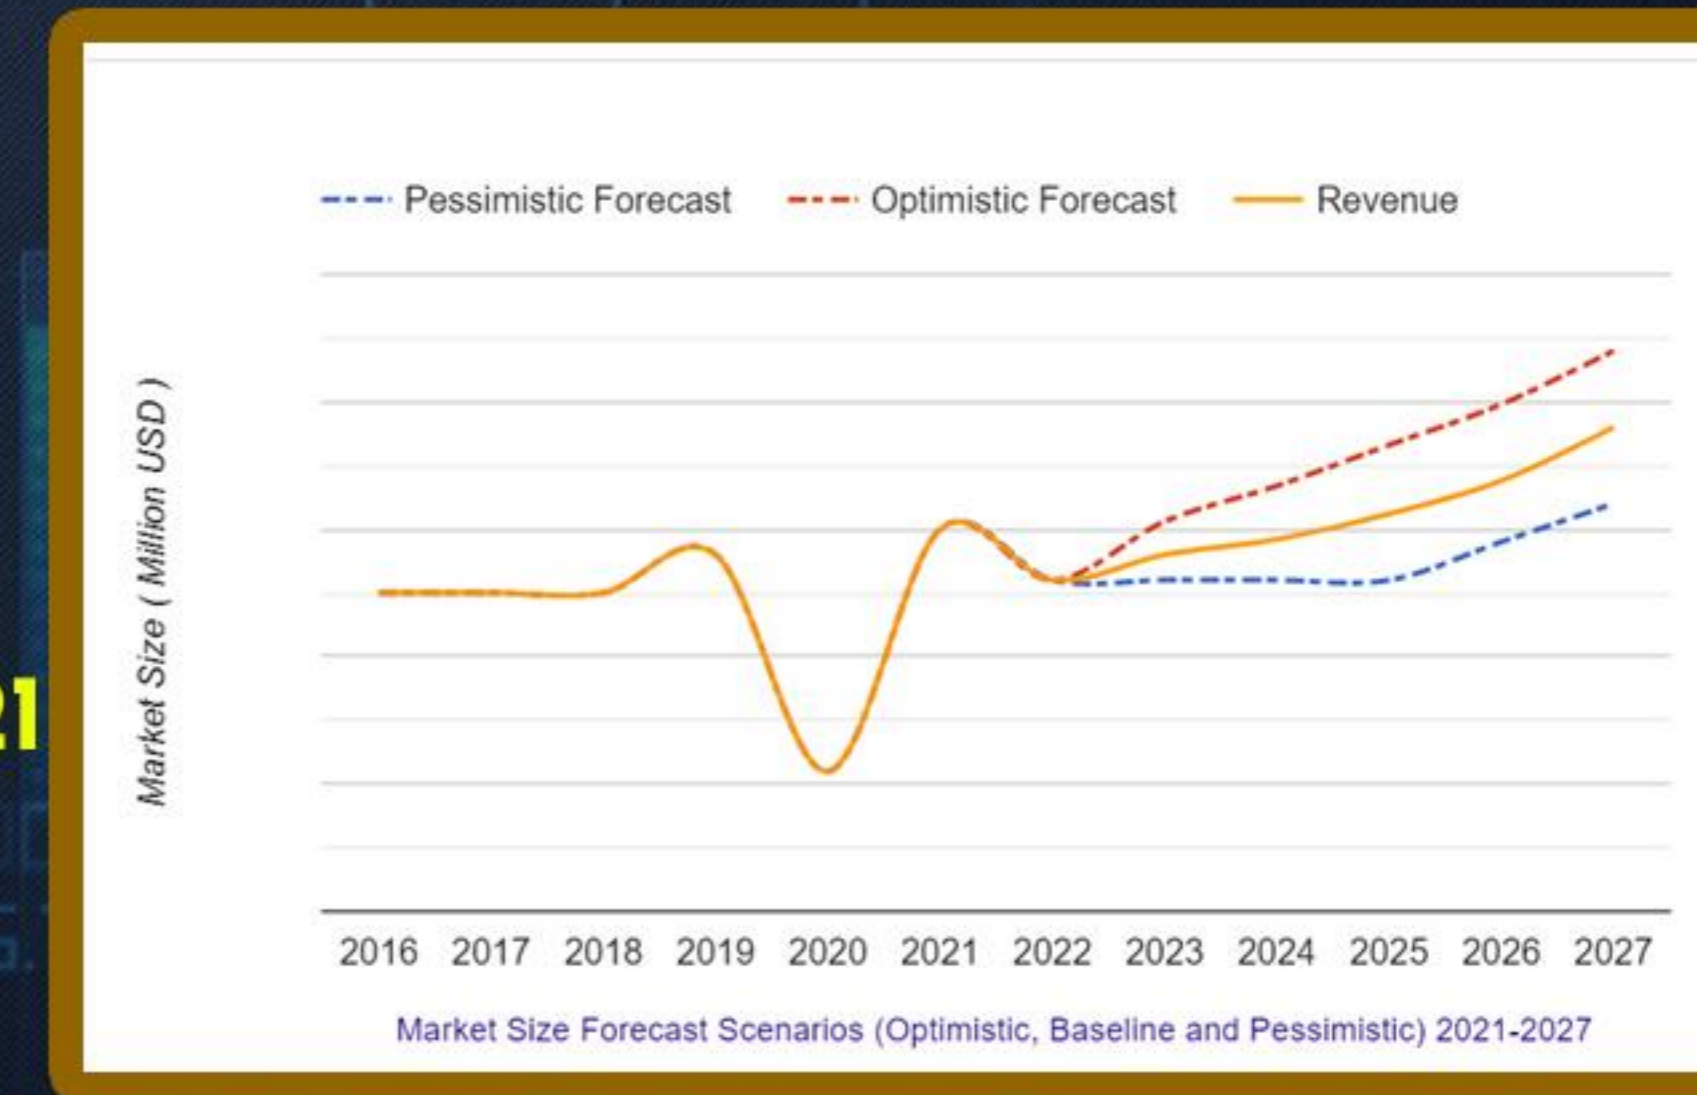

Many major technology companies, including Apple, Facebook, and Microsoft, have plans to develop products to support the metaverse trend. Experts believe that businesses have recognized a new range of potential from the virtual universe, ranging from selling hardware and software to support access to the metaverse to virtual goods, services, and advertising in the virtual world. In the Metaverse, tech giants began drafting business plans. All estimates of future growth seem bullish in metaverse space. According to Bloomberg Intelligence, the global metaverse revenue opportunity could approach \$1 Trillion in 2024 as compared to around \$500 billion in 2020.

Metaverse: What To Expect In Decade?

The metaverse is the next big technology platform, attracting online game makers, social networks and other technology leaders to capture a slice of what we calculate to be a nearly \$ 1 Trillion market opportunity. Social, persistent, shared, virtual 3D worlds, the metaverse is the convergence of the physical and digital realms in the next evolution of the internet and social networks using real-time 3D software. It presents an opportunity for leading online entertainment and social media companies to capitalize on new revenue streams.

The Metaverse Market Size: USD 209.77 USD Billion in 2021
Expected to reach: USD 1 Trillion by 2030
Expected To Grow with: CAGR of 22.7%

Real Estate business

We love our students, so we set them up with everything they need to succeed. When you invest in a Relo course, you're getting a value-packed arsenal of tools that will help you way beyond exam day. We aren't just known for our high exam pass rates and outstanding content - we're also the **ONLY** online real estate school that gives you the business-building skills, continuing education, and incredibly useful extras that will make your career transition a smashing success. Cryptocurrency and forex trading

There are a several differences between forex and cryptos from markets participants to size, structure, accessibility to assets and volatility. Both markets are volatile, however cryptocurrencies tend to experience more volatility than forex pairs. The forex and cryptocurrency market aren't regulated in a similar ...

zaxa control in the stock market

A stock market, equity market, or share market is the aggregation of buyers and sellers of stocks, which represent ownership claims on businesses; these may include securities listed on a public stock ...

Here are the major types of stocks you should know.

- * Common stock.
- * Preferred stock.
- * Large-cap stocks.
- * Mid-cap stocks.
- * Small-cap stocks.
- * Domestic stock.
- * International stocks.
- * Growth stocks.

We have our own cloud data center

A cloud data center moves a traditional on-prem data center off-site. Instead of personally managing their own infrastructure, an organization leases infrastructure managed by a third-party partner and accesses data center resources over the Internet.

How do Data Centers work?

- ★ systems for storing, sharing, accessing, and processing data across the organization;
- ★ physical infrastructure to support data processing and data communication; And
- ★ Utilities such as cooling, electricity, network access, and uninterruptible power supplies (UPS).

NEW INNOVATIONS

If a trading company is part of a large organisation which has substantial funds, then business transacted by the trading company which is acting as the principal may be secured using a financial guarantee supplied by the parent company. Effectively this means giving the trading company open credit and care must be taken that the parent company has been carefully screened for its own credit worthiness. Some traders came unstuck in 1991 when a well known trader with whom people traded on parent company guarantee sent shock waves through the industry as its parent company faltered under fraud charges.
